SCHOOL REPORT.

With the close of every school year the question, how to improve our facilities for the education of our children, presents itself with ever increasing force. With the progressive spirit of the age keeping pace with the progress made in the arts and sciences, comes the demand for higher education among all classes and both sexes. The boy born and reared on our farms may be destined to sit in our national halls of legislature, or direct the vast enterprises of some colossal business stretching out its busy lines to every part of the world. The girl who now knows no other life than that incident to our quiet town, may in the near future sit in solemn dignity on the Full Bench with the learned Doctor of the Law, or be called to preach the Gospel of Good Tidings in some elegant city church. Men and women with educated brains are in demand as never before in the history of the world, and it becomes us as parents to see to it that our children shall not be handicapped in the race by any deficiency in education which we could have supplied. Thousands of men are today filling positions of the highest character, standing foremost in the affairs of men and of the land, who as boys rode the horses to plough and drove the cows to pasture on our farms. Many women now wives of men famous in all the branches of the world's industries, creditably maintaining their position among the richest and the greatest of the land, as girls attended our country district schools and helped their mothers in the busy round of household duties. No one can tell or even guess, where the lives of the humblest among us are to end. We know these truths have been presented to us all, time and again, but we believe it will do us good to keep them constantly in mind, always remembering that there are no children among us so humble, but that some just as humble have in our day risen to the highest places in our land.

In the public schools of our land are now being developed the traits of character that will make or unmake the men and women who are to take our places in the world. If, in these schools they acquire the habits of punctuality, ready obedience to superiors and positiveness in regard to what they know, and what they don't know, they will have acquired much beside and beyond book knowledge that will be of inestimable value to them in years to come.

SCHOOL REPORT.

We believe the school year now closed to have been a prosperous one. The schools have been well attended. The teachers as a rule have honestly tried to do their work well, and the scholars have been well disposed and have given us very little trouble. We think there has been a steady improvement in the character of the schools and the behavior of the pupils. We think the terms have been long enough. After about so many weeks the children get tired and the schools cease to be profitable. If we are to have more schooling, we want an extra term, not longer terms. There was not money enough for an extra term, so we thought best to save what was left for another year in the hope that then we might have an extra term. Many of our people want the children to have more schooling. It is a question in our minds whether it would be better to have an extra term all round, or to have the extra money expended in maintaining a high and grammar school for the larger pupils of the town. In Hancock we understand they have two terms all round and a high school in the winter in the center of the town. With a little extra money we can do better than that. We could have two terms all round and in the winter a high and a grammar school in the two rooms in the new school house. The Board feel themselves to be but the servants of the people, and their only wish in the matter is to take the course that will satisfy our people. We believe we have as bright and capable children as any town in the world, and we would like to see them have every advantage possible, so that the people who celebrate the two hundredth anniversary of Greenfield may say of us, with all our faults we looked well after the interests of our children. Let us not forget that we are making the history of our second century of existence as a town. Shall we not try to make such a history as our children's children shall not need to be ashamed of? Let the dead past bury its dead. We need to put forth our best endeavors as a united and intelligent community if we are to keep up with the procession in the onward movement of this great nation towards an ideal civilization.

SCHOOL REPORT.

Another school year has closed, and a very busy and prosperous year it has been. Our schools are standing on higher grounds. They have been well attended during the past year, and with perhaps one or two exceptions, we have had very good teachers, who have entered into their work with a good deal of energy, and have worked faithfully not only to draw their salaries but for the best interest of the scholars under their care. The money you have put in our hands has been judiciously expended according to our best ability for the best interest of all the schools in town. We believe the present system of having three terms each of the two schools in the village and two terms each of the three outside districts, and a chance for all to come to the village school in winter, is the best arrangement that could be made. We have during the past year made great improvements on two of our school houses, so that now they are neat and pleasant as school rooms need to be. But we still lack other improvements for schooling in town, and that is, the people in the east district are in need of a new school house, which we hope to see built this spring, after which Greenfield will have as good places to educate her sons and daughters as any small town need to have. Nothing will give a town a better name than good school houses and good schools. Give your boys and girls a good education. Let us all do what we can for the children of today, who will soon take the places of their fathers and mothers in the world, and then with a good education they will be prepared to fill any station in which they may be called.

REPORT OF THE SCHOOL BOARD.

The completion of the new school house in the east part of the town, for which $600.00 was appropriated at the last school meetting, places us among the New Hampshire towns that are creditably supplied in that respect. We feel that we need no longer be ashamed of our school houses. They are good enough for any small town, and we congratulate the citizens of Greenfield upon the fact that we haven't a poor school house in town.

It will be seen by the report that your committee overrun the appropriation by a little over $60.00. We built the school house for the amount appropriated, but are still in debt for the desks and furniture. We feel confident, however, that no one who has looked it over will say that the money was not wisely expended. We have yet to hear a man say we could have done all that should have been done with less money. The interests of the town are one, and one portion can not be improved without benefitting the whole town.

Now that the town has provided so well for the schools, we think parents should appreciate it and see that their children regularly attend. There is much need of improvement along this line. The town has provided liberally for our children. We have pleasant, well-furnished schools. Books, and everything the scholar needs, are provided without cost to the pupils. Rich and poor fare alike—the poorest child in town can have equal advantages with the richest. It only remains for the parents to see to it that their children do their part and take these advantages for which the town pays. It is right here the trouble lies. Parents seem to think a day or two lost every week no harm. The fact is, every day a child is absent he loses something he may never have a chance to make up, for in one school this last year there were 365 whole days lost in one term in this way. That means that some of our children have lost something that money cannot buy and will be just so much loss to them all through their lives. Then again, many children who do regularly attend school fail to derive as much benefit from it as they otherwise would, because they hear the teacher criticised so much at home. The best teacher that ever lived cannot overcome the harm done by this. The poorest teacher will teach pupils enough to pay for sending them if they are not so prejudiced at home. Even if the teacher is not very good, we gain nothing and lose much by telling the children we think so. We should make the best of it instead of the worst of it.

With the money appropriated for that purpose, we have greatly improved the grounds of the village school, and can take pride in its appearance. We believe the town is acting very wisely in being so liberal about school matters. Our children can have no reason to be ashamed to own their birthplace. Greenfield is, and will be, a good place to be born in and to live in.

REPORT OF LIBRARY TRUSTEES.

Within the year our much talked about library has been started and has been open for the distribution of books seven weeks. We have 250 books, all of which we have purchased except 18 or 20 received from D. W. Burnham, formerly belonging to an old library association. Up to date 69 cards have been issued. We are now letting out over 50 books a week. We would urge the immediate need of more books. We have not succeeded as yet in obtaining the state books. They have been promised and we are in hopes we shall soon receive them.

REPORT OF SCHOOL BOARD.

In the treasurer's report will be found one item marked "Borrowed from School Fund." This is the explanation of that. It has been the custom heretofore for the selectmen to pay the bills for school supplies. The law is, "The School Board shall purchase at the expense of the town text books and other supplies required for use in the public schools." This year the selectmen refused to pay for the supplies. We then took counsel and found there were no funds available for that purpose. It now seemed to us the best way out of the difficulty was for us to borrow money and pay the bills. There was a surplus in the treasurer's hands. It seemed better to borrow from that surplus than go outside for the money. In the future a sum of money will have to be appropriated every year for that purpose.

During the year we have obtained the books from the State. These, with a few left to us by the late Silas Winn, together with those purchased with the year's appropriation, brings the total number of books now in the library up to 479 volumes.

During the year there have been no books lost or badly damaged. There have been 166 cards given out. The average number of books taken out per week was 39. We believe the usefulness of the library has been demonstrated. Will you continue its usefulness by an adequate appropriation for new books each year?

We have examined the reports of the Selectmen, Treasurer, Road Agents, Overseer of the Poor, Liquor Agents, Treasurer Library Trustees, Treasurer of School Board, and find them correct and properly vouched.

GEORGE D. GOULD, }

In submitting our reports, we believe that it is poor economy for any town not to appropriate money enough to pay their running expenses. We wish to call your attention to your appropriations of 1895, also our expenditure of your money of this year, and you will readily see that it is impossible for your town to decrease its debts, with so small appropriations. You will notice that the amount received from the state has decreased this year $394.45. We don't advocate high taxes, but you must not find fault if your board of Selectmen don't pay any of your town debt, with so small an appropriation, and we submit for your consideration at our annual town meeting the following appropriations to meet current expenses, which we think advisable for the best interest of the town.

To pay town expenses,	800 00
Roads and bridges, ¼ of 1 per cent. of total valuation, estimated,	650 00
In addition, for contingencies, and breaking roads in winter,	300 00

Respectfully,

FRED B. ATHERTON, } Selectmen
FRED W. DUNCKLEE, } of
ETNA J. FLETCHER, } Greenfield.

REPORT OF SCHOOL BOARD, 1896.

Agreeably to the requirements of the law, the School Board submits the following report:

The money you have put in our hands has been judiciously expended according to our best ability for the best interest of all the schools in town. To select suitable teachers and aid them the needed assistance requires a combination of rare qualities. No office of the town is of greater importance than that which has relation to the superintendence of schools, and in order to keep the schools in a flourishing and active condition the parents must co-operate with the teachers. They must feel and manifest an active interest during the term. It is in their power greatly to aid or entirely counteract the labors of the best teachers.

Much might be said in governing schools. While some govern too much, others govern too little; but they who govern by a motion of the finger or a glance of the eye, or some silent reproof, are the most successful. It is of great importance in having the educators of our children qualified and adapted for their work. The young mind needs to be cared for and educated by those who understand its motives, its powers and the peculiarities of each pupil, especially in the lower grades. One of the most essential benefits to be derived by the town is to see that a proper amount of funds are appropriated to give your children a good practical education. Nothing gives a town a better name than good schools and well kept schoolhouses.

Therefore let the people, whether they have children or not, do all they can to promote the best educational interest of the children at the present day that they may be prepared to fill any station of life which may be required of them as they leave the home of childhood to earn their living and enter the active duties of good citizenship.

REPORT OF SCHOOL BOARD.

Agreeably to the requirements of the law, the School Board submits the following report. The money put in our hands has been expended according to our best ability, for the best interest of all the schools in town. In consequence of an oversight of the voters we have been obliged to close our schools the present winter, and we sincerely hope you will raise the necessary funds to support three terms in every school district in town the coming year.

We wish to call the attention of some of the parents to the law which was passed at at the last session of our Legislature in regard to scholars attending school. It is hard work for a teacher to do good work where the scholars are absent three-fifths of the time. If parents will only take an interest in this matter there is no reason why Greenfield cannot be abreast of other towns in the matter of education, and send her boys and girls out into the world well fitted for the walks of business life. Therefore, let us all do what we can for the children of today, who will soon take the places of their fathers and mothers, and be prepared to fill any station in which they may be placed.

Number of scholars not less than 5 years of age who have attended public school not less than two weeks,	113
Number of visits by citizens,	235
Money raised by law,	$740 00
In addition,	100 00
Dog license,	57 10
Literary fund,	70 06
Rent of hall,	50 00
Rent of library room,	10 00
Rent of dining hall,	1 50
